

AG BELT™ RUBBER MOUNTED **RAKE TEETH**

Our **Rubber Mounted Rake Teeth** are manufactured to the highest quality standard for long-lasting performance and durability in the field.

FIELD TESTED. FARMER APPROVED.

AG Belt™ Rubber Mounted Rake Teeth are injection molded from premium natural rubber to achieve the highest standard of quality. We then heat treat the tines to ensure durability and long-lasting performance. Finally, we use a premium bonding agent to achieve maximum rubber adhesion.

Why did we do all that? Because we know that even smaller components – like rake teeth – can mean the difference between a decent yield and a great one. And it's why AG Belt rubber mounted rake teeth are the choice of producers all across America.
